Presented by:

Lillian Neuman, CASAC

Director of Community
Engagement

St. Vincent's Hospital
Westchester

Naloxone is a prescription medicine that reverses an overdose by blocking heroin or other opioids in the nervous system for 30-90 minutes. Naloxone is administered by injection or intranasal.

***Following training,
participants receive a free kit by mail.***

St. Vincent's Hospital Westchester offers crisis services, inpatient and outpatient mental health and addiction recovery services and residential programs. Learn more at <https://www.stvincentswestchester.org>.
